## Art & Science camp upcoming

From staff reports • May 12, 2010

The Acadiana Center for the Arts' Creativity @ the Center is now accepting applications for CitySmarts Art & Science Camp, a summer camp for children between the ages of 6 and 12.

Campers will have the opportunity to explore three types of renewable energy: solar, wind and hydropower through the eyes of artists and scientists.

Sessions are limited to 20 campers each. Those interested in registering their children for a fun-filled summer of hands-on learning can call 233-7060 or visit Acadiana

CenterfortheArts.org to download the CitySmarts application.

See below for the dates and descriptions for each session.

Session 1: June 14—18 — The Art and Science of Solar Energy.

Session 2: July 5—9 — The Art and Science of Wind Energy.

Session 3: July 12—16 — The Art & Science of Hydropower.

The AcA believes that when children actively participate and experience something first-hand, their learning comes alive.

In each weeklong session at the AcA, campers will discover the arts and science through activities and experiments that will inspire them to create and explore. With only 20 campers per group, each child is nurtured in his or her learning experiences.

**Mom Dilemma #36:**  
Your daughter insists on wearing her princess costume to the grocery store. Allow it or not?

YES, at least she's dressed!

NO, I have some rules!
